

CML E350 MULTI RIP SAW

The CML Entry Level Series is tailored to meet low to high volume production requirements. With the Entry Level Series, you get the features you need, without paying for extras you don't.

The E350 series features a heavy-duty, fixed, 1 or 2 moving blade solution with higher horsepower ratings for higher volume customers.

CML has industry-leading rip saws to help you successfully optimize the use of all material. Designed to meet your unique production requirements, the high performance CML rip saws optimize materials and minimize costs.

CML rip saws deliver high quality cuts with limitless application possibilities. Whatever your requirements. CML has a rip saw to help you make the most of every situation.

Technical Specifications

- | | |
|---|-----------------|
| ■ Max cutting thickness | 80 mm (3.14") |
| ■ Max cutting width | 320 mm (12.5") |
| ■ Min board length | 600 mm (23.6") |
| ■ Min board length (short stock option) | 400 mm (15.7") |
| ■ Max pass through width | 650 mm (25.5") |
| ■ Feed belt motor | 1.5 (2 hp) |
| ■ Feed belt speed | 46 M/min (150') |
| ■ Main drive motor | 37 Kw (50 hp) |
| ■ Maximum blade speed | 3500 rpm |

Advantage

- Glue Line Quality
- Enhanced Safety Features – Four Anti-kickback fingers
- Laser Guidance
- Efficient Main Motor
- Roller Chain Design
- Onboard Optimization (Moving blade only)

Available Options

- Hydro Sleeve - For faster pocket width changes, the hydro sleeve can be installed on the arbor. Three collars are free moving on the sleeve and each is mounted a saw blade (sold separately)
- Performance Rip Infeed
- Patented Hold Down Shoe

Optimization

Roller Chain Design
