

HOMAG DRILLTEQ V-200 CNC PROCESSING CENTER

HOMAG CNC Machines.

German Engineered.

World Renowned.

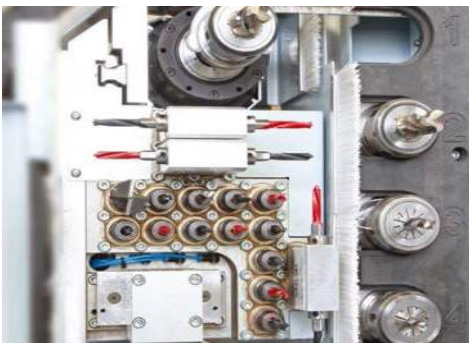

Features

- 13 vertical high-speed drilling spindles
- 6 horizontal drilling spindles (4X, 2Y)
- Grooving saw D=100 mm (X-direction)
- Tool changing spindle HSK 10 kW
- 4-slot pick-up tool changer
- woodWOP programming software
- 850 mm max. pass-through width
- 56 mm max. part thickness

Advantages

The DRILLTEQ V-200 is...

- **Fast** – no setup time and fast processing
- Ideal for **just-in-time** and batch size 1 production
- **Compact** small footprint of only 62 square feet
- **Easy** and simple machine operation with PowerTouch
- **Cost-effective** price-to-performance ratio
- **Rigid, reliable, and repeatable** construction
- Installation and training are **included**
- Industry-leading **service and support**

Powerful, reliable, and efficient – Robust machine design with speeds of 50 m/min, for the demanding CNC user

Drill quick-change system – The patented system ensures easy installation or change of drilling bits

PowerTouch – innovative and intuitive technology for optimal productivity
