

# REGIONAL SERVICE & TRAINING CENTER

30 factory-certified technicians within the region

Stiles University is the industry's only nationally accredited workforce development program. Our team of certified professionals guide students through comprehensive, hands-on technical and application trainings designed to equip you with the knowledge you need to optimize your machinery and manufacturing practices.

# EDGETEQ S-300 SERIES

The HOMAG S-300 series edgebanders are designed to help customers increase their production levels by incorporating servo automation to the processing stations, infeed fence and pressure beam. The machine is equipped with a 24" powerTouch control, which makes adjustments and program changes quick and easy with minimal need to open the hood. The S-300 series comes in single and two-motor corner-rounding, as well as airTec options, and grooving making it an ideal choice for customers who value increased production and the simplicity of machine automation.

**S-300 SERIES** | The HOMAG EDGETEQ S-300 Series of edgebanders produce perfect edges for small shops to large-scale furniture and component industries for the highest-quality results. Building on the quality, performance and features of the S-200 and S-240 series, the S-300 series offers increased feed speed and automation through servo processing.

EDGETEQ S-300  
Overview Video

PowerTouch represents the operating philosophy of HOMAG: standardized, simple, ergonomic and evolutionary. A large, widescreen multi-touch monitor allows machine functions to be controlled directly by touch. The entire programming offers numerous help and assistant functions that make working processes substantially easier and efficient.
